

### Video « Bad day in the lab »

Time	Text
00 :11 - 0 :17	So, the experiment of today ... So, what do we have?
0 :27 - 0 :35	So, for today ... we have to do an acid dilution with water. Alright.
00 :43 - 0 :50	Okay so ... let's begin. First, let's sample some acid solution.
01 :08 - 1 :13	And then the water. Okay, so the water is on the left and the acid is on the right.
1 :18 - 1 :28	Then, for the dilution we need 25 millilitres ... 25 millilitres, so with the volumetric flask.
01 :28 - 1 :33	Okay so now for the dilution I need my little pipette.
01 :38 - 1 :42	Hello! I am sorry I cannot talk to you right now, I am in the lab so ...
1 :42 - 1 :47	What is it for? ...
1 :47 - 1 :54	Pff I don't know, it should finish around 6 pm so ... Let's say 6:30-7:00 pm.
1 :54 - 1 :58	Listen, I have to hang up ...
1 :58 - 2 :02	I can't, really! Let's discuss about it later.
02 :06 - 02 :17	Okay so where am I? I've got the water on the left and the acid on the right, so I can start the dilution ... A bit of acid for the beginning.
02 :49 - 02 :53	Ok ... Now a bit of water.
03 :03 - 03 :08	So, to make up to the mark I need a wash bottle ... A wash bottle .... There is one over there.
03 :08 - 03 :15	Oh shit ... Fuck, I got it all over myself! Hopefully, it was the water.
03 :15 - 03:20	Aie it's burning! It was not the water!
